Education

Thadomal Shahani Engineering College, Mumbai

2021 - 2025

Bachelor of Engineering in Artificial Intelligence and Data Science — CGPA: 8.16

Technical Skills

Programming: Python, SQL, Java

Databases: PostgreSQL, MySQL, MongoDB, DB2

Backend Skills: RESTful APIs, API Integration

Developer Tools: Git, GitHub, Docker

Data & ML: Pandas, NumPy, Scikit-learn, Matplotlib

Frameworks: Django, FastAPI

Experience

DXC Technology

June 2025 – Present

Analyst II – Software Engineer

- Designed, integrated, and validated RESTful APIs for enterprise systems, ensuring reliable data exchange and seamless backend integration.
- Designed, developed, and debugged enterprise software using COBOL, SQL, and DB2, improving data reliability for over millions of transactions.
- Implement end-to-end data workflows including extraction, validation, transformation, and loading (ETL) for premium calculation, claims reconciliation, and regulatory reporting.
- Managed documentation, reporting, and database operations to support enterprise-grade software workflows.

Technical Projects

Luxura – Indian Travel Planner

[Link](#)

- Designed and implemented FastAPI backend with asynchronous endpoints, Pydantic validation, dependency injection, and multi-agent architecture.
- Integrated SerpAPI, weather APIs, and LLM chains to generate personalized 3–10 day itineraries with flights, hotels, local attractions.
- Fully containerised application using Docker, multi-stage Dockerfiles, and Docker-Compose for reproducible deployment.

Mumbai Flat Price Predictor

[Link](#)

- Developed a machine learning project in Python using Pandas, NumPy, and Scikit-learn on 10,000+ real estate listings.
- Engineered features and a trained Random Forest Regressor model achieved $R^2 = 0.925$ (92.5% accuracy) with an average error $\pm$ Rs. 34 Lakh.
- Built and deployed an interactive web application using Streamlit and Joblib for real-time price prediction.

Quiz Web Application

[Link](#)

- Built a FastAPI backend with a fully asynchronous file processing pipeline, handling PDF uploads and generating 10 MCQs per document.
- Integrated Google Gemini API with retry logic, Pydantic validation, and structured prompt engineering for an accurate generation of questions.
- Implemented robust backend logic, including database initialization, request handling, API routing, and real-time communication with a ReactJS frontend.

Publications

Securing Media Integrity: A Blockchain-Based Approach Against AI-Generated Deepfakes

[Link](#)

- Designed a blockchain-based framework for media authentication to detect and mitigate AI-generated deepfakes.
- Published in **Springer Nature LNEE Series** (Scopus Indexed) and presented at ICACIT 2024.

Achievements

Maharashtra Student Innovation Challenge 2023 – Winner:

Recognized by Maharashtra State Innovation Society (MSInS) for developing an innovative tech solution.

Certificate of Appreciation – Ambassador:

Awarded for serving as an Ambassador in the Department of Artificial Intelligence and Data Science for the academic year 2024–2025.
